The value I receive from satellite radio is immense. The ability to instantaneously receive traffic reports makes a difference in my ability to sell more products. Selling more allows me to pay more taxes. I spend 4+ hours a day in the car. I listen to both regular radio programming and Satellite. I'm happy to pay for the convince and programming on the satellite. It is my right to buy what I can.

I made a conscscious decision between the choices of XM or Sirruis. This is simple free enterprise. Dont strangle it!!

Don't outlaw instant traffic or weather programming on satellite radio.
